IsoSciences, LLC specializes in the custom synthesis of stable isotope labelled compounds. We are now pleased to offer as catalog items the following compounds. These items have generally never been available to researchers before nor have their syntheses appeared in the literature. We are pleased that we are able to offer these hard to find stable isotope labelled compounds to the research community.

Larger quantities of the compounds listed in the catalog may be ordered at a discounted price. Please inquire as to pricing and availability. If you do not find what you need on these pages, please contact us and we can give you a quote on the custom synthesis of the compound that you do require.

Exact microbalance weighing of material is available for an additional fee. This ensures that your entire sample may be used for your critical assays without wasting any material.

Orders may be placed by telephone, fax, or e-mail. Please include the telephone number of the recipient on all orders and your preferred method of payment. Payment may be made by check or bank transfer. Payment is due within 30 days of receipt of invoice. Credit card orders are also accepted (Visa, Master Card, American Express).

Shipment is by Federal Express overnight priority. Shipping charges depend upon location but are typically \$25 for domestic (United States) shipping.

No one works harder for you!

Ordering Controlled Substances for Shipping Within United States

- We must have a current DEA on license on file prior to shipping your order.
- Your DEA license may be faxed to us at the time of your order. Your order will only be shipped to the address specified on your DEA license.

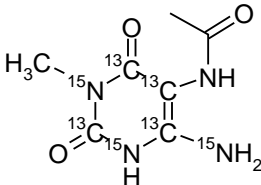

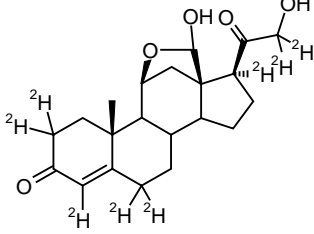

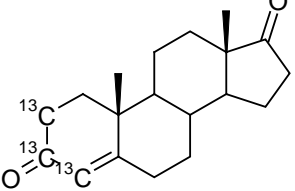

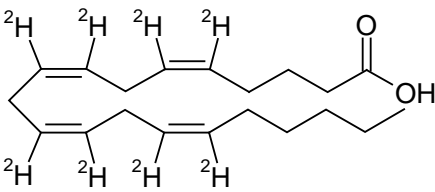

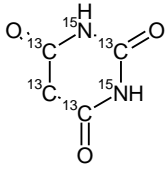

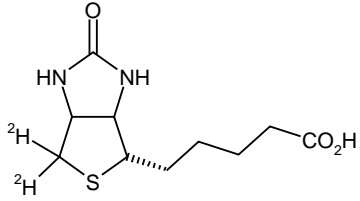

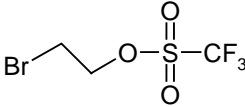

Ordering Controlled Substances for Export from the United States

Anabolic steroids are classified as controlled substances in the United States. We may only export these after we receive the following:

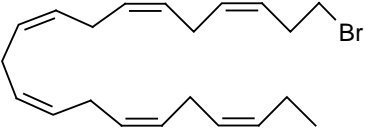

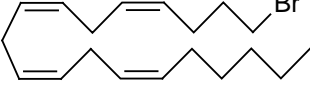

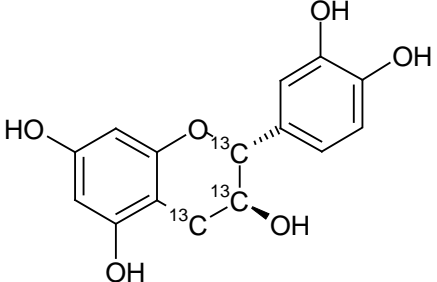

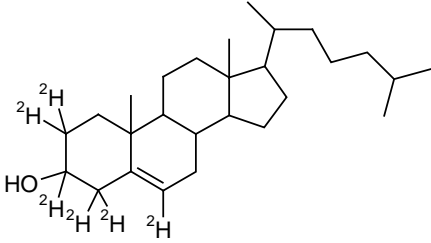

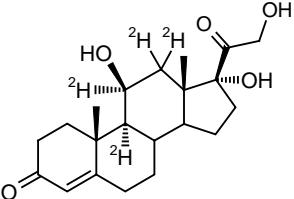

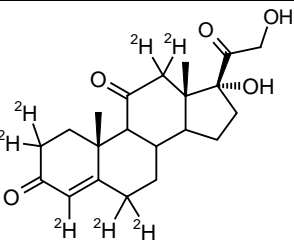

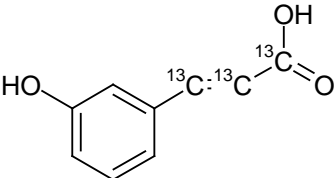

- You must provide an official letter of permission in English stating that you are allowed to receive anabolic steroids.
- The letter of permission must accompany your order and must state whether it is for this transaction only or whether it can be used for future orders. Indicate the compound you are ordering and the amount.
- You also must provide a letter in English from your company stating that the substance you are ordering will not be re-exported and will only be used for scientific or medical use within the receiving country.
- When we receive your order and all the documents required as described above, there will be a delay period of at least 15 days while the documentation is submitted to the Drug Enforcement Agency (DEA) in the United States.
- Shipping and handling charges will be added to your invoice. Charges are determined based on weight of package and destination. We ship exclusively Federal Express. There will be an additional charge of \$60 (US) to prepare and process all the export documentation.
